## THE PLEXUS OF TIME

We have always been interested in the greatest mystery of the universe — time itself.

Our life experience tells us that events occur in a certain sequence, but time is not always divided into past, present and future. Some physicists go even further, suggesting that time never runs out. It simply does not exist, it is an illusion. Instead of viewing time as a straight line, we can use our memories as a source for thinking about the future. It is very important. The human ability to travel through time in the imagination is the reason why we can do many things, such as planning the future or creating works of art.

In our opinion our new show, *The Plexus of Time*, perfectly illustrates our approach to the idea of ever-changing time, as in a single transparent capsule, the past, present and future are connected here, creating a sense of timelessness.
